

# **Tenant Policy Book**

## **Operating Hours for Management and Building Services**

### **Building Management Office**

Office hours are 8:00 AM – 5:30 PM, Monday through Friday

### **Building Operating Hours**

The building is open and all services are available from 7:00 AM to 7:00 PM, Monday through Friday, excluding Holiday hours.

### **HVAC Hours**

Hours of operation for HVAC will be 7:00 AM to 7:00 PM, Monday through Friday, and 8:00 AM to 1:00 PM on Saturday, excluding Holiday hours.

### **Building Access**

Building access is available from 7:00 AM to 7:00 PM, Monday through Friday. Access cards are needed during non-business hours.

### **Janitorial Services**

Janitorial services are provided after building operation hours five days a week.

### **Payment Information**

Checks should be made out to “Boyle Cool Springs Joint Venture” and sent to:  
Boyle Cool Springs Joint Venture  
P.O. Box 17800  
Memphis, TN 38187

### **Elevators**

All elevators operate during building operating hours. Access cards must be used on the elevators during non-business hours.

## **Holiday Hours**

The building observes the following holidays:

New Year's Day	Labor Day
Good Friday	Thanksgiving Day
Day after Thanksgiving	Christmas Eve
Memorial Day	Christmas Day
Fourth of July	

Building services are not provided on these days and the management office will be closed.

## **Heating, Ventilation and Air Conditioning (HVAC)**

An automated HVAC system operates to ensure your comfort in the building. Strategically placed sensors control the temperature. If adjustments are required, please call Kent Smith in the Boyle Management Office.

## **HVAC after Hours**

If you would like to request HVAC outside of the normal operating hours, you must complete an HVAC After-Hours Request Form and send it to the management office. These forms are available in an email form and will be sent to you by Kent Smith. We prefer a 24-hour notice on HVAC requests, but later requests will be honored if possible. Billing for this service will run in accordance with your lease.

## **Maintenance Services**

### **Service Calls**

Requests for services such as temperature control, access control, electrical problems, janitorial, etc., should be directed to the Management Office at (615)550-5575. Each department should designate one person as the contact for coordination with the management office to make sure any calls are handled in a timely manner.

### **Engineering Services**

A maintenance/handyman service can be provided by the Engineering Staff upon request. Extra service requests are charged back to the employees' at \$35/hour during normal business hours and \$45/ hour after hours. Possible services provided are:

- Moving Furniture, relocating boxes/items
- Special cleaning by janitorial service
- Service repair of tenant –owned equipment; excluding HVAC or computer equipment
- Handyman services (hanging picture , general repairs, locks)
- Disposing of miscellaneous office items.

### **Alterations of Tenant Premises**

Requests for alterations or additions to your premises should be made in writing to the Boyle Management Office. For example, services ranging from electrical, to telephone service outlet changes, to partition changes would be included. Please refer to your lease for specifics.

### **Keys**

Office keys will be provided per the lease. Keys can be obtained by contacting the management office at (615)550-5575. No additional lock, latch or bolt of any kind may be placed upon any door, nor will we allow any changes in existing locks without the written consent of the Landlord. At the termination of the Lease, Tenant shall return all keys to the Landlord.

## **Janitorial Service**

Janitorial services for the building are provided five days a week. Trash generated during the workday will be removed by the building janitorial service. Trash items should be kept within the office and never placed in the hallways, stairways or lobbies. We suggest removing all loose items, papers, etc. from desktops each night, as the cleaning personnel are instructed not to disturb desktop materials. Requests for extra or special cleaning should be made, in writing, to Boyle Investment Company.

Please notify Boyle if you intend to hold an after-hours function that requires cleaning service after normal hours.

### **Items NOT included in nightly cleaning:**

- Articles left on desks or furniture
- Special wall fabrics
- Computer equipment
- Dishes, Refrigerators, and Microwaves

***This service may be arranged for an additional charge. Please call Kent at (615)550-5575 for information.***

All trash should be clearly identified. If it is not in the trash can, please label with stickers/markers. Any questionable items will not be thrown out.

## **Moving Policy**

The following rules pertain to moving furniture, equipment and supplies in and out of our buildings:

### **ANY MOVERS THAT DO NOT ADHERE TO THE FOLLOWING RULES SHOULD NOT ENTER THE PREMISES. IF THESE POLICIES ARE VIOLATED, THE MOVE WILL BE DISCONTINUED**

- Clean masonite sections will be used as runners on all finished tenant areas, especially when heavy furniture/equipment is being moved with wheel/skid-type dollies. The masonite should be at least ¼” thick. All masonite should be taped to prevent sliding.
- Protective coverings must be provided and installed, by the mover, on all vulnerable corners, walls, door facings, elevator cabs and other areas along the move route. These areas will be inspected for damage after the move and tenant will be (billed) responsible for repairs.
- Duct tape should never be stuck to the employees’, walls, doorjamb, or doors.
- The tenant must arrange, with the management office, for use of the freight elevator for their move. A firm arrival time will be established.
- The moving company should remove trash items generated by the move including boxes, wall protection, pallets, and packing materials. Old records and files should be purged prior to the move to save your company time and money.
- No employees of the moving company are allowed to smoke in the buildings.
- All moving company employees should be in an identifiable uniform or wear an identification badge.

The moving company must carry insurance coverage including, but not less than, the following:

- Worker’s Compensation in the amount of \$100,000; bodily injury and property damage liability insurance in comprehensive general liability form.
- Comprehensive general liability insurance policy shall include coverage for hazards on premises – operation, elevators, products and completed operations, including personal injury coverage part and contractual liability coverage part designating the assumptions of liability under performance of the act of moving. Such insurance shall be in limits no less than \$500,000 per person bodily injury and personal injury; \$500,000 per occurrence for aggregate or property damage. Property damage insurance shall be in broad form, including completed operations.
- An umbrella policy with a limit of \$5,000,000 per occurrence.
- All moving company employees must be bonded.

- Each moving company moving supplies, furniture, and/or equipment through the building shall secure and present to the building manager a certificate reflecting this coverage at least forty-eight (48) hours prior to the scheduled moving date.

## **Mail Service / Deliveries**

### **Mail Service**

Drop boxes for overnight services are located at the building. Please check individual boxes for drop/pick-up times.

Federal Express  
UPS

### **Deliveries**

Deliveries of large objects, a quantity of items and evening deliveries should be prearranged by calling Boyle at (615)550-5575. Please give a minimum of 24-hours notice to ensure availability of the freight elevator. All deliveries will be allowed through the service (loading dock) entrance only and should use the freight elevator.

## **Emergency Procedures**

The purposes of this Emergency Procedures Manual is to prepare all occupants to cope with emergency situations should they arise. The ability to respond quickly, with a coordinated effort of trained individuals operating as a team, is vital to effectively dealing with any emergency situation.

Fires, bombs, bomb threats, tornadoes, severe weather conditions, power blackouts, etc. are all improbable but can occur with little or no warning. Advance planning can result in better protection of people and property. Our aim is to provide safety to all occupants and minimize the effect of emergency specifically related to the office building. In order to assure quick response and reduce, if not eliminate, the probability of personal injury, we recommend that all Employees' establish independent plans which can be effectively implemented should an emergency situation develop. A copy of each plan should be filed with Boyle Investment Company. If you need assistance in formulating your plan, please contact Kent Smith at (615)550-5575. Each department should designate at least one Emergency Coordinator for their area. This

person will coordinate with Boyle Investment Company during drills or actual emergencies. Any change in assignment should be report immediately to Boyle.

Boyle Investment Company is not in a position to require Employees' to take protective action. These instructions are a guideline, but there may be occasions when one's best judgment must prevail. We do recommend that all employees' become familiar with the contents of the Emergency Procedures Manual as well as the emergency equipment and exits. Boyle will, from time to time, make changes and/or additional to be included in this Manual. Therefore, we ask that you keep your Manual up to date and see that all of your employees are familiar with its contents.

Once evacuated, please report to Boyle Investment Company at the following locations: corner of Carothers and Corporate Centre Drive

### **Responsibilities**

Emergency Coordinators will be designated by each Tenant to take charge of his/her particular area within the tenant space during an emergency. In emergency situations, the Emergency Coordinator is responsible to Boyle Investment Company and/or Fire/Rescue Department. The Emergency Coordinator will be thoroughly familiar with the Emergency Procedures Manual and with any additions or revisions. He/she must be familiar with physical features of his/her area including but not limited to smoke detector locations, fire extinguishers, emergency exits, pull stations, etc., and the number or occupants in the assigned areas.

The Emergency Coordinator will maintain a current list of individuals who are disabled or would have difficulty during an emergency. The Emergency Coordinator will assign Special Assistants to aid those individuals, if evacuation should become necessary. The number of Special Assistants will vary according to need.

In the event of an evacuation, the Emergency Coordinator will be responsible for checking each office, restroom, conference room, etc, in his/her assigned area to ensure that everyone has heard the alarm and is in the process of following evacuation of emergency procedures. Once the evacuation is completed, the Emergency Coordinator will get a headcount of all occupants, visitors, etc., from his/her area, at the designated assembly area to determine all have been accounted for and report the number to Boyle Investment Company or the Fire Department.

The Emergency Coordinator will be completely familiar with floor plans, the number of occupants within his/her tenant space, and the location of all tenant exits. He/she will daily examine corridors leading to his/her assigned area to determine all fire doors to stairs are maintained in the closed position and that no doors are obstructed or

inoperable. Most importantly, if a fire is within his/her assigned area, he/she will see that the door to the room containing the fire is CLOSED.

The Emergency Coordinator will appoint an Assistant Emergency Coordinator to act in his/her absence. Each Emergency Coordinator shall review the Emergency Procedures Manual with all Assistant Emergency Coordinators and with each Special Assistant appointed with his/her tenant space.

The Emergency Coordinator shall assign an area in the parking lot where all members of his/her group will assemble in the event of a building evacuation. The assigned area must be along the perimeter of the parking lot, well away from the building so as not to impede fire trucks or the work of the fire department. The assigned area will be communicated to all members of his/her group and to Boyle Investment Company.

It is mandatory that everyone evacuate the building during any drill. Anyone that remains in the building is subject to fines up to \$500 from the Franklin Fire Department.

## **Bomb Threats / Bomb**

### **Receiving a Bomb Threat**

Bomb threats are usually received by telephone through a switchboard or receptionist. However, they may be received by other means and by anyone either inside or outside the tenant company.

### **The Person Receiving The Bomb Threat Should:**

- Alert another employee discreetly, by passing a note or signaling, to notify senior management, Emergency Coordinators and Property Manager that a threatening phone call has been received. Be sure they are advised of the telephone number that the call is on.
- Complete the "Bomb Threat Checklist" (See Checklist on the following pages) while talking to the caller. Switchboard Operators and other most likely to receive threats should keep the Checklist conveniently at hand.
- Keep the caller on the line as long as possible. Ask that the message be repeated. Write down everyone word of the caller.
- If the caller does not identify the location of the bomb, time of detonation, type of bomb, what the bomb looks like or why the bomb was planted, ask the caller to provide this information.
- Pay particular attention for background noise such as traffic or running motors, which might give clues to the place from which the call is being made.
- Listen closely to the voice to determine sex, approximate age, voice quality, accent, and speech impediments.

- Do not discuss the bomb threat to anyone else unless instructed to do so. This is to prevent panic and unauthorized disclosure to the news media.

### **The Emergency Coordinator Will:**

- Alert the Assistant Emergency Coordinator and stand by for instructions from Boyle.
- Initiate the search of the tenant, if ordered.
- Implement relocation/evacuation in accordance with the evacuation plan, if necessary.

### **Search**

Upon evaluation of a report received that a bomb has been placed within the building, a search may be ordered. Any search for an explosive device is dangerous and must be conducted by persons who are trained and willing. The police will be asked to assist in the search. However, Emergency Coordinators and their Assistants are familiar with their areas and will notice extraneous objects quickly. Search teams should include Emergency Coordinators, Assistants, and the police.

The purpose of the search is to locate and report suspicious objects, not to move, jar or touch the object or anything attached to it. The removal or disarming of a potential bomb must be left to the professionals in explosive ordinance disposal.

The search party must be given all available information including:

1. Reported location and type of explosive device
2. Tenant plans of search areas
3. When to halt the search

The search team should be separated into pairs, with each group assigned specific areas to search.

- As the search of each area is completed, a report to the Emergency Coordinator should be made who will report to Senior Management and Building Management.
- A search is best conducted by dissecting the areas into three levels. Divide rooms into three levels starting with the tenant. Search thoroughly the bottom third of the room. The second level is the mid-section of the room and the third level is from second level up to ceiling.

### **Suspicious Object Located**

Upon location of a suspicious object during a search, the police will summon the bomb squad. When such an object is located either during a search or observed without prior warning, the areas should be cleared and the Emergency Coordinator advised

immediately. The object should not be touched, handled, or moved in any way except by professionals in explosive ordinance disposal.

### **The Emergency Coordinator Will:**

- Notify the tenant's Senior Management and Building Management.
- If the object is obviously or probably a bomb, immediately evacuate the tenant in accordance with the relocation/evacuation plan.
- If the identity of the suspicious object is uncertain, the Emergency Coordinator should clear the immediate area of the suspicious object and await instructions from Senior Management who will issue the order to relocate or evacuate, if necessary.

### **What To Do If You Find A Bomb**

If a bomb or what you might think to be a bomb is found, **DO NOT TOUCH THE OBJECT**, but immediately follow these instructions:

- Dial 911 – Advise the 911 operator that you have discovered what you believe to be a bomb, then provide the following information:
  - Your Name
  - Name and Address of the Building:  
  
**501 Corporate Centre Drive  
Franklin, TN 37067**
  - Location of the “Object”
  - Description of the “Object”
- Call Boyle Investment Company at (615)550-5575 and report the emergency information. Advise Building Management of instructions received from authorities. Building Management will advise other Employees' who might be affected.
- If the authorities recommend that the building be evacuated, use exit doors **AWAY** from the **DANGER ZONE**. Boyle will give instructions to other employees'. **DO NOT USE ELEVATORS.**
- **DO NOT** re-enter the building until Boyle or the authorities have notified you that it is safe to do so.

In the event a bomb threat is received via telephone, follow the procedures outlined on the **Bomb Threat Checklist** available for immediate use if such a call is received.

If you receive a bomb threat, we will ask that key personnel assist in a brief search of your site. This will aid the police department in determining more

quickly if there is something suspicious within your area. The individual employer will decide if they wish to evacuate if a threat is received.

## **BOMB THREAT CHECKLIST**

Questions to ask if you receive a Bomb Threat:

Keep caller talking as long as possible. Get as much information as possible. Do not be hostile – be calm, listen carefully – DO NOT INTERRUPT.

1. Copy exact text of message:

2. Question Caller:

When will it go off?

Where is it located – what tenant?

What kind of bomb is it?

What does it look like?

Will it hurt people?

Who are you?

3. Did the caller indicate knowledge of the building by his description of the premises?

4. Please try and make notes about particular items, such as:

(Check all applicable descriptions)

**IMMEDIATELY AFTER THE CALL, DO THE FOLLOWING:**

Record the time of the call                      Time: \_\_\_\_\_AM/PM

Notify your Supervisor                              Time: \_\_\_\_\_AM/PM

Notify Police (911)                                      Time: \_\_\_\_\_AM/PM

## **Fire Safety and Building Evacuation**

The purpose of the Fire Safety and Building Evacuation Plan is to provide fire drill and evacuation procedures in the event of fire or other Emergency situations. Boyle will:

- Supervise Fire Prevention Program
- Conduct periodic fire drills in conjunction with the Fire Department
- Advise Fire Department's Office in Command of all information relative to the operation of all systems and other applicable information pertaining to the building.

## **Fire Prevention**

Fire could result from the careless acts of employees, electrical short circuits, equipment malfunctions, arson, etc. Events such as tornadoes or explosions could result in the additional hazard of fires. Some fires such as wastebasket fires can usually be controlled with the use of fire extinguishers by building occupants. However, fire spreads rapidly. It is, therefore, the policy to **IMMEDIATELY CALL THE FIRE DEPARTMENT IN THE EVENT OF ANY FIRE.**

Duties In The Event of a Fire:

### Individual

- Activate one of the manual Fire Alarm Boxes located in the elevator lobby or next to each Emergency Stairwell.
- Notify the Fire Department, telephone number – 911. Calmly and distinctly give exact location, tenant area, etc. At the same time, request others to clear employees from the immediate fire area and combat the fire with portable fire extinguishers if the fire is small (wastebasket, etc). As soon as possible, your Emergency Coordinator should be notified to begin their procedures.
- Clear the immediate area of the fire and follow instructions from your Emergency Coordinator.
- Notify Boyle Investment Company.

### Emergency Coordinators

If the alarm is sounded, the Emergency Coordinators shall proceed with evacuating their suites and relocating all personnel to the appointed safe areas.

- Ensure that the Fire Department has been notified and dispatch an Assistant Emergency Coordinator or other employee to extinguish small fires, (wastebasket, etc) by use of portable fire extinguisher if safe to do so.

- Ensure that a manual Fire Alarm Box has been activated.
- Ensure that the Management Office has been notified.
- Prepare all personnel for evacuation

#### Do Not Use Elevators

- Ensure that all personnel and visitors are accounted for and that all doors have been closed.
- Exit by the nearest **EMERGENCY STAIRWELL**.
- Evacuate all personnel to the designated area in the parking lot. Stay away from the building.
- Notify building management that all personnel are evacuated or give a list of people still in building.

#### **If Evacuation is required**

- Keep calm; do not run or panic.
- The Emergency Coordinators will check each office, restroom, conference room, etc., in your assigned area to ensure that everyone has heard the alarm and is following evacuation procedures.
- **EXIT VIA STAIRWELLS – ELEVATORS ARE NOT TO BE USED IN AN EVACUATION!**
- The Emergency Coordinator shall confirm that all occupants from your suits are safely evacuating the tenant. Report location of anyone not evacuated to Firefighters in the stairwells on their way to the tenant of the fire. Once all personnel are at their assigned area in the parking lot, give a report to Building Management including location of personnel not accounted for.

#### **Designate Area for Assembly**

Each tenant will designate an area in the parking lot **AWAY FROM THE BUILDING** as a meeting place for his/her staff. It is important that all personnel, in order for the Emergency Coordinators to confirm that all occupants have safely exited the building, utilize the designated area. The Emergency Coordinators must report to Building Management. Building Management will notify the Fire Department that all employees' and visitors are accounted for in the parking lot, or if necessary, give the location of people who did not exit the building.

#### **Fire Extinguishers**

Small fires such as wastebasket fires may be contained quickly by using a fire extinguisher.

All fire extinguishers located within the building are:

Type A-B-C & Halon and Dry Chemical Used for Paper, Wood,  
Clothing, Rug, Oil, Grease,  
Paint, Fluid and Electrical  
Equipment Fires

Because fire extinguishers are designed and manufactured in many different ways, it is not possible to develop a single set of procedures to cover every model. However, most extinguishers operate from the same general principles. These general operating principles can be remembered by use of the term PASS.

**P**ull  
**A**im  
**S**queeze  
**S**weep

**Pull** means to pull the pin. Some units require the releasing of a lock latch, pressing a puncture lever, inversion of the canister, or some other motion that has the effect of actuating the discharge.

**Aim** the extinguisher nozzle (horn or hose) at the base of the fire.

**Squeeze** or press the handle. This permits the discharge to be placed in the direction of your aim.

**Sweep** the nozzle from side to side at the base of the fire. Watch for a backlash of flame. Move in close and give attention to hot spots. Discharge the entire contents of the extinguisher and be ready to start over again with another extinguisher.

**NEVER ATTEMPT TO FIGHT A LARGE FIRE WITH A FIRE EXTINGUISHER!**

**LEAVE THE ROOM, CLOSE THE DOOR, AND REPORT THE FIRE!**

Boyle Investment Company is responsible for the maintenance/inspection of the extinguishers in the shared building areas, including the corridors, hallways, and stairwells.

## **Life Safety Systems and Communications**

The building is equipped with a modern Life Safety System that includes the following features:

- Automatic Sprinkler & Standpipe System
- Fire Alarm Pull Stations
- Smoke Detection System
- Fire Rated Emergency Stairways
- Automatic Door Release Systems
- Elevator Recall
- Emergency Power Service
- Audio Visual Alarms

Below are some of the functions of the systems listed above:

- Fire Alarm Pull Stations: Pull Stations are located next to the two emergency stairwells in the corridor on employees' 2 through 6. The pull stations are located at the exits on the first tenant. The fire alarm is activated by manually pulling down on the activation bar.
- Automatic Door Release System: This system is designed to automatically close certain doors on magnetic locks, which limits smoke travel.
- Elevator Recall and Emergency Services: In the case of fire, elevators are dangerous and are not to be used. The following system has been installed to safeguard persons using or attempting to use the elevators during a fire emergency.
  - Automatic Recall: In each elevator lobby above the ground tenant, there is a smoke detector for the control of this system. If any of these detectors sense smoke, all elevators will close their doors and return to the ground tenant where they will remain with doors open until released by Building Management or Fire Department personnel.
- Emergency stairs: There are two stairways in the building. Both stairways are designed to withstand fire for at least two hours, allowing for evacuation, if necessary
- Emergency Control Center: This Center is located on the first tenant and is devoted solely to the control of fire and other emergencies. Its systems include:
  - Telephone-communication lines from Elevators.
  - Fire alarm panel that locates tenant reporting fire alarm, whether from a manual pull station, smoke detector or water flow switch.
- Audio Visual Alarm System: The building is equipped with alarms and strobes. These are installed on walls of tenant spaces and public areas. The audio alarm is distinguished by burst of buzzer-like sounds. The visual alarm or "strobes" are flashing lights designed to notify hearing-impaired persons that an emergency situation may exist.

## **Severe Weather Conditions**

### Tornadoes and Strong Winds

Severe weather can usually be anticipated and each Tenant will be responsible for deciding what action he/she will take. Although tornadoes are not frequent hazards in this area, they have been encountered on occasion. This type of emergency gives little or no warning and there is no way to determine duration or severity.

If any tenant is aware of the possibility of a tornado in the area, Building Management should be advised. They, in turn, will advise all employees'.

Below are recommended instructions, depending on the type and severity of the weather and whether there is adequate time, for evacuation.

If a tornado or other severe weather condition presents a threat to the occupants of the building, and there is not enough time to evacuate, follow the procedure below:

- The Emergency Coordinator should move personnel to areas of the Building AWAY from the windows and other exposed areas into more protected areas of the Building (inner offices, corridors, closets, restrooms). DO NOT stand under light fixtures or other objects that may fall.
- Close all blinds to exterior windows and close the exterior office doors, creating a barrier from the outside windows.
- In the case of a tornado and there is no time to get into a suggested area, as stated above, get under a desk or something that will provide protection from flying glass and/or debris.
- Remain in place, if possible, until it has been determined that the severe weather has completely left the area.
- Emergency Coordinators should check their areas for injured employees, fires or other damage caused by the storm.
- If fire or damage has caused unsafe conditions in the building, the Emergency Coordinator should proceed with an evacuation as may be required for the safety of the occupants of this area.
- As soon as possible, the Emergency Coordinator should notify Building Management of any damage and ascertain recommended procedures to follow.

If severe weather presents a threat to the occupants of the building and there is time to evacuate and prepare your area, follow these procedures.

- Valuable equipment and documents should be moved from outer offices to interior rooms. Materials and equipment should also be covered and stored in plastic to reduce any effects of water damage.
- All loose paper, documents and other items should be filled and stored away from windows to reduce flying debris in case windows break out.

- Close all window blinds of exterior windows and close all doors between outer offices and inner spaces, creating as much of a barrier from the outside window as possible.
- All computers, telecommunications equipment, office equipment and appliances should be turned off and unplugged to protect them from possible power surges.
- Critical data or equipment should be prepared for removal for removal easily when an evacuation order is given.

**Tornado Watch/Warnings:**

- Tornado Watch – this means weather conditions are right for a tornado or severe thunderstorms are possible.
- Tornado Warning – this means a tornado has been spotted; find shelter immediately

**Should a Tornado Warning be in effect for the area, please do the following:**

- Stay away from windows, doors and outside walls; protect your head
- In buildings such as these, go to small interior rooms or hallways

**Evacuation Procedures**

- Under most circumstances, you will have plenty of time to evacuate and will be able to exit the Building as you would on any workday. In the unlikely event of an emergency evacuation, it will be necessary to exit the building by the stairways.
- If there is a power outage, you are instructed to exit via the stairwells. Special Assistants should be made available to assist the disabled.
- Secure or remove any valuable, lock file cabinets and desks, turn off the lights in your office or area, and lock the entrance doors to your suite.
- Go to your home or designated Emergency Evacuation Shelter. DO NOT attempt to return to your office until notified by the appropriate local government agency or by Building Management.

The BEST preparation you can make is to familiarize yourself with these procedures now and notify Building Management of any questions you may have.

**What to Do After the Storm**

After the storm, Building Management will assess the damages. Building Management will be in contact with the Emergency Contact person from each Tenant suite. It is very important that Building Management is kept informed of the Emergency Contact person's home telephone number, pager and/or cell phone number. If the building is accessible, Building Management will notify the Emergency Contact. If there is major damage, entry to the building may be restricted. If this is the case, Building

Management will escort small groups of people to each space for Employees' to gather items needed.

### **Disabled Persons**

Each Emergency Coordinator should survey his/her area and make a list of disabled persons who would require assistance of the tenant of building during an emergency. Persons on crutches who are temporarily impaired and pregnant women should also be included on this list of disabled persons.

The Emergency Coordinator shall assign Special Assistants to each person on the disabled list. These Special Assistants should normally be located in the direct vicinity of the disabled person and should be capable of quickly assisting the disabled person in the evacuation of the tenant or building.

The designation of these Special Assistants should be in the Emergency Plan prepared by each tenant and submitted to Building Management.

The Emergency Coordinator should also make provisions for assisting injured or disabled visitors during an Emergency Evacuation.

### **Evacuation Procedures for Disabled Persons**

The Emergency Coordinator or Special Assistant will assist in helping the disabled persons to the stairwell, which is the designated "safe area". The Special Assistants may carry or assist disabled persons down the stairs or have them wait for the Fire Department. If the disabled persons are waiting in the stairwell, the Special Assistant will inform the Fire Department or Building Management and let them know the specific number/location of these individuals and they will be assisted by the Fire Department.

### **Blackouts**

In the event of a power blackout, use the following procedures:

- Turn off all electrical equipment such as computers, typewriters, copy machines, etc., to lessen the electrical load on circuits when power is restored.
- Employees' will be advised when Building Management has been able to determine the cause and possible duration of the blackout.
- Each Tenant will determine what action to take. If a Tenant decides to evacuate the premises, it will be necessary to use the stairs, as the elevators will be inoperable. Also, please advise Building Management of your intention to leave.
- Building Management will check all elevators and take action to remove any passengers from the inoperative elevators by the use of Building

Management staff or Nashville Machine Company, the elevator Maintenance Company.

- During a power outage, the building is designed to provide security lighting in the stairwells, corridors and within your suite, to allow safe exit from the building.

## **Chemical Spills/ Civil Disorder / Injuries**

### Chemical Spill or Chemical Fumes

Most large chemical spills will be caused by accidents in nearby industries or on railroads/highways. Fumes from these accidents can affect large areas.

The local Police or Fire Departments will normally notify Building Management if any action is required from external spills, but the first report may come from employees of the building. The Emergency Coordinator should immediately be informed and should notify Building Management of any chemical spills that occur within the building or on the property. Building Management should arrange to have air handling equipment shut down and air intakes closed as required. Windows and doors may also need to be closed. Occupant movement may have to be limited to protect their well being. Building Management will be responsible for notifying proper authorities, if necessary.

The building should not be evacuated unless ordered to do so by local authorities. If fumes become severe within the building, evacuation may become necessary. Good judgment must be used to prevent the panic of occupants, visitors, etc., and to evacuate them from the source of the fumes.

Emergency Coordinators should follow the Emergency Coordinator's procedures and take steps to account for all occupants, visitors, etc.

### Civil Disorder

A civil disorder serious enough to cause evacuation of the building is highly unlikely. However, the Emergency Coordinator should call the Police (911), should a civil disorder take place in your area. They will assist however necessary. After calling 911, the Emergency Coordinator should notify Building Management at (615)550-5575 (during or after normal business hours).

### Injuries, Accidents, and Medical Aid

Should any injuries or accidents occur in our around the building, we recommend that the Police Department and/or Rescue Squad be called at 911.

If the injured party needs to be transported to a medical facility, the Rescue Squad will make arrangements. Building Management should be called to be on hand to assist

the medical team by providing assistance locating the injured party and expediting departure from the building.

Building Management should always be advised of any accidents that occur on the property.

## **Miscellaneous Items**

### **Space Heaters**

No machinery of any kind, other than ordinary office machines such as typewriters, computers, fax machines, scanners, information processing systems, copy machines, communications equipment and calculators, shall be operated in any premises in the Building without the prior written consent of the Landlord, nor shall any tenant use or keep inflammable or explosive fluids or substance (including live Christmas trees and ornaments), or any illuminated materials. **No space heaters or fans shall be operated in the Building**

### **Discount Movie Tickets**

Carmike Cinemas and Regal Theaters discount movie tickets can be purchased in the Management Office. The current prices are \$8/each for Carmike and \$8.50/each Regal, although the price may change at any time. There is a ten ticket limit per purchase. We accept checks only, make payable to Boyle Cool Springs Joint Venture. You must also show your access card upon purchase. There is a return check charge of \$20. For additional information, please contact Boyle.

### **Copier/Computer Electrical Requirements & Special HVAC**

Most copier/computer equipment requires special wiring and additional HVAC service. Additionally, special outlets may be required. Approval for such special requirements should be obtained from the Management Office.

### **Smoking**

Meridian is a non-smoking office complex.

### **Pet Policy**

Meridian has a No Pet Policy. It states “No animals shall be brought into or kept in or about the Building” (exception for service animals). If you notice that this policy is being violated in the building, please contact the Management Office immediately at (615)550-5575.

## **Janitorial Schedule**

### **Daily**

1. All desks and other furniture will be dusted with specially treated dust cloths.
2. All window sills, chair rails, baseboards, moldings, partitions, and picture frames under six feet in height will be hand dusted and wiped clean.
3. All floors will be dust mopped with specially treated dust mops.
4. All bright metal work will be maintained and kept in a clean, polished condition.
5. All drinking fountains will be thoroughly cleaned and sanitized.
6. All stairways will be swept with a chemically treated dust mop and wet mopped as needed.
7. Replacement of light bulbs as needed.
8. All elevators will be wet mopped. If elevators are carpeted, carpet will be vacuumed nightly. Interior of cabs will be wiped clean and all metal hardware polished.
9. Empty, clean and dust all wastepaper baskets, ash trays, receptacles, etc.
10. Remove trash and wastepaper to designated areas.
